Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This action is in response to the amendment filed on 2/14/07.

New claim 6 has been added.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Olesen 5,004,142.

Olesen discloses a staple legs bending mechanism comprising a driver 23, a clincher holder (not shown numerically), a pair of clinchers 15a, 15b, and a clincher actuating member 19,21 (claim 1), wherein upper surfaces of the clinchers (at opposite ends of 18a,18b) are positioned lower than an upper surface of the clincher holder when the clincher actuating member is positioned in a top dead center position as shown in fig. 3. A stopper formed on the clincher holder and comes into contact with the clincher actuating member 19 as shown in fig. 3 (claim 2).

With respect to claim 3, it is deemed that the clincher holder has a thickness of a table.

With respect to claim 4, Olesen discloses wherein the clincher actuating member includes a block-shaped member 19.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Olesen 5,004,142 in view of Eriksson.

Olesen discloses the invention including a clincher actuating member with a block-shaped member 19, but does not disclose a pair of cam members respectively provided for the pair of clinchers. Eriksson teaches the concept of a stapler having a clincher mechanism comprising a pair of clinchers and a pair of cam members 7' respectively provided for the pair of clinchers for the purpose of independently pivoting each clincher. It would have been obvious to one having ordinary skill in the art to have substituted the pair of cam members of Eriksson for the clincher actuating mechanism of Olesen in order to independently pivot each clincher member.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant contends that Olesen pair of clinchers 15a,15b extend beyond the clincher holder. However, Examiner contends that Olesen clinchers' surfaces at opposite ends of pivoting pins 18a,18b are positioned lower than an upper surface of the clincher holder.

For the reasons above, the ground of rejection are deemed proper.

Art Unit: 3721

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Conclusion
